

## # README

### # Dependencies

Python3 and numpy package

### # Interface

We implement the interface about 2D matrix, shown as below. You just to press the button on what you want to choose.

### # How to use it

- choose the function you want to to
- input the matrix according to the standard format (like `[[1, 2, 3], [1, 2, 3]]`)
- press the "calc" button and you can get the result
